INTRODUCTION

This Resource Directory was developed by the EMT Group, Inc., under its Community Alcohol and Other Drug Prevention Technical Assistance Contract with the California Department of Alcohol and Drug Programs (ADP). The directory was created in recognition of the variety of technical assistance (TA) and training services, information clearinghouses, and libraries that serve communities involved in reducing and preventing problems associated with alcohol, tobacco, and other drugs (ATOD).

The purpose of the directory is to assist agencies, organizations, community groups and individuals in identifying and utilizing technical assistance services and other information sources available in California.

The directory consists of two general sections. The first, ***Technical Assistance and Training Services*** includes descriptions of the California-based, ATOD-related training and technical assistance services available. The second, ***Resource Centers, Libraries, and Other Information Sources*** consists of ATOD-related information and materials that are available through California-based organizations. The entries for each section are listed in alphabetical order. For identification of services focusing on specific populations, settings and subject areas, please refer to the index starting on page 40. Organizations are only listed under the index headings for which they explicitly reported providing services. For example, only two organizations specifically reported providing TA services or materials in the area of HIV/AIDS and the relationship to ATOD use. However, some of the other organizations may also be able to provide TA services or materials in this area, but did not explicitly identify this topic in their service descriptions. It is recommended that you contact the organizations of your choice to get more specific information on the range of services they provide.

Each entry includes the following information:

- agency's name, address, telephone number, and E-mail address (when available);
- contact person;
- services offered;
- target population or groups served;
- eligibility criteria;

- fees (if applicable);
- application procedure;
- funding source or agency; and
- time limit on availability of services.

This directory primarily consists of contractors who provide ATOD technical assistance on a statewide basis and provide those services free of charge. However, a few of the organizations listed also provide technical assistance and/or resource materials for other related issues (*e.g.*, violence prevention, HIV/AIDS prevention, etc.) and/or may charge a fee for services. While considerable effort has been made to ensure the accuracy of the information provided by each organization, some omissions or errors may be present. Please notify the ADP Resource Center of any corrections that are needed.

It is important to note that while compiling this directory, EMT Group was in contact with every contractor; but, a contractor's inclusion in this directory is in no way an endorsement by ADP or EMT Group. Every attempt was made by EMT Group to make this directory as comprehensive and current as possible. However, some contractors may have been inadvertently overlooked, or not included if they did not respond to inquiries about their services. If this occurred, please complete the blank *Service Description Form* at the end of this directory and mail or fax it to the ADP Resource Center, 1700 K Street, First Floor, Sacramento CA 95814. Fax: 916.323.1270. Notices regarding corrections to this edition of the directory should also be sent to the Resource Center.
